Objective

I aspire to engage in **challenging Java/J2EE projects** and secure a **prominent role** within a dynamic software organization. My goal is to advance my career while seizing opportunities to contribute to innovative and demanding work in the field of Java/J2EE.

Profile Summary

- Result Oriented , self-driven , highly motivated and keen to learn new technologies.
- Have good knowledge on Java2EE , JSPs ,Spring Framework ,Spring MVC etc along with basic of JavaScript/Jquery , Ajax .
- Hand on Java-8 features like lambda expression , Stream API , Functional Interface , Optional class ,Date and Time API , ForEach() method.
- Hands on Spring Boot , JDBC ,MYSQL ,JDBC Template ,Mongo Template , Maven , Web Services.
- Hands on Postman , git, Json ,Log4j Eclipse & Intellij IDE.

Technical Skill

Languages	Java , J2EE
Framework	Spring Framework –Spring IOC,Spring MVC ,Spring Boot
Databases	Oracle , MySql
Scripting Languages	JavaScript , HTML and XML
Applicaton/Web Servers	Apache Tomact
Java Technologies	J2EE , Spring , Spring Boot , JDBC , **JdbcTemplate , MongoTemplate , Maven , MYSQL , MongoDB**
IDE	Eclipse , Intellij IDEA

Certification

Completed a six-month training in JAVA Full Stack Development at Naresh IT, Hyderabad from June 2023 to November 2023.

I have completed the online course on Spring Boot 3 and Spring Framework 6 from Udemy.

EDUCATION

- **Master of Computer Applications (MCA) (Pursuing)** Aug 2024 - May 2026
  Lovely Professional University

- **Bachelor of Computer Application (BCA)** Aug 2020 - May 2023
  NRI Group Institutions Bhopal, Under Barkatullah Vishwavidyalaya, Bhopal

- **Intermediate Education** Apr 2018 - Mar 2020
  Shiv Ganga Vidya Mandir , CBSE Board

- **High School** Mar 2016 - Mar 2018
  Shiv Ganga Vidya Mandir , CBSE Board

Projects

PROJECT #1 : Online Product Store
Environment : Eclipse , IntelliJ , MySQL and OracleDB || **App Server :** Apache Tomcat

- The **Online Product Store** project aims to create a web-based platform using **Java**, **Java Servlet**, and **JSP (Java Server Pages)** technologies. This platform allows users to **create new accounts**, **log in via existing accounts**, **view all products**, and **conveniently purchase items online**. Key features include **user authentication**, **product management**, **shopping cart functionality**, and **order processing**.
- The **Admin Dashboard** provides an interface for authorized personnel to **manage products**

PROJECT #2 : Online Banking System
Environment : Eclipse , IntelliJ , MySQL and Oracle DB || **App Server :** Apache Tomcat

The Online Banking System project focuses on creating a robust and user-friendly web-based platform using **Java**, **Java Servlets** , and **JSP** (Java Server Pages). This platform empowers users to conduct essential banking tasks online, including managing accounts like Opening New Account or login existing account , transferring funds, paying bills, and transactions like **Withdrawal Amount** , **Deposite Money** , **Check Account Balance**. By prioritizing data confidentiality, integrity, and availability, the system delivers convenient and secure banking services to user.
